5. Revamping our plans and optimization of current business model to suit the pandemic and post-pandemic world.
6. Business financing pursuit

Near - Prospects

OUR SOCIO-ECONOMIC EQUITY PROGRAM

A brief about our Socio-Economic Equity program:

Our CSR program is focused on empowering low income stakeholders in the chain by creating a socio-economic feedback and proportional equity in profits of the corporation.

We, at Natur Bazaar believe that a CSR program can be more impactful if it is assumed as a responsibility by all of its stakeholders. This program also aims at socio-psychological reforms to the mindsets of higher grade employees to create an affinity towards empathy and increase their humanitarian works.

Farm Laborers, farmers, technicians, and low-income employees based on sweat equity shall receive benefits from annual profits of the company.

Innovation and Intrapreneurship will be fostered within the company to constantly better it.

Since this program is very ambitious, a lot of opinions are under consideration and the CSR policy is not fully ascertained. It is under continuous development.

MONEY MATTERS - CAPITAL REQUIREMENTS AND PROFORMA

Natur Bazaar is seeking to raise 15 Million USD for all its projects planned in 4 different rounds

(Capitalization: Assets, farm O&M, Manufacturing O&M, Infrastructure, HRM, administration and legalities)

DISCLAIMER !!!

We developed proformas based on the sales potential reflected from the CBD and THC offtake LOIs from our clients. Based on the current global and local situation, we would like to refrain from sharing them, as we are doubtful about their applicability in the current year.

FOR INVESTORS

Natur Bazaar SAS is all open ears to Investor offers. It's not just money that we seek. We seek socialization and empathy of Investors with our whole team alongside their wisdom and patience, to make our business sustainable and successful.

WE ARE THANKFUL

We hope that you were enlightened by our presentation and will join our journey in any way that you can because you too care for the planet and your pocket.
